“Data Science, Artificial Intelligence and IOT”: The New Normal.

26JUNE, 2020

Session – Report

WebinarCo-ordinators

Mrs. C. Hema

Mrs. Madina Banu,

Mr.V.Balaji

Conveners

Dr. E. Syed Mohamed, Prof.&Head, CSE,

Dr. Venkatesan Selvam, Dean, SCIMS

Resource Person : Mr. Imtiyaz Sheriff.C,
Director, Ideassion Technology Solutions,

Date : 26th June 2020, Friday

Time : 11:00 AM to 12:30 PM

PREAMBLE

The Department of CSE conducted the live webinar on “Data Science, Artificial Intelligence and IOT” for the students, scholars and teaching faculties. Mr. Imtiyaz Sheriff.C, Director, Ideassion Technology Solutions delivered the lecture.

Ideassion Technology Solutions is a leading Data Science, Big Data, Business Analysis, Data Analysis, and Business Analytics educational institute offering training programs which includes key techniques such as Statistical Analysis, Regression Analysis, Data Mining, Machine Learning, Forecasting and Text Mining, and tools such as Python and R Programming designed to bridge the gap between academics and industry.

The course content delivered in the webinar is as follows:

The impact of recent technology in Data Science, AI and IOT in the living environment was discussed in this session.

The Speaker of the Session Mr. Imtiyaz Sheriff.C presented the keynote address on “Data Science, Artificial Intelligence and IOT”. He discussed the basic concepts used in the technology relating with best suitable real life examples which are essential for the understanding of technology. He projected a clear understanding of the importance of intelligent robots and future problems in the real world. He inspired the audience by lively interacting on topics such as new trends in applying Data-driven, Machine Learning approaches for business decisions and incorporation of Artificial Intelligence, Big Data, and Machine Learning applications. He discussed about analyzing structured and unstructured data using different tools and techniques, developing an understanding of descriptive and predictive Analytics, building models for day-to-day applicability, perform the forecasting to take proactive business decisions, using data concepts to represent data for easy understanding. The Speaker explained how to effectively use this Corona pandemic to develop us according to our future needs. The students learnt the critical and necessity is the mother of invention. The speaker gave an in-depth perspective on such things as the combination of Data Science and Artificial Intelligence. He also said that how the pandemic situation has changed the industry to bring changes in their algorithms to analyze the customer needs. He

projected on comprehending the theoretical concepts and relating to the practical aspects of artificial intelligence. He insisted on modeling algorithms for deep learning, clustering, and recommendation systems

Also the feedback about the session was collected from all the participants to improve the sessions that will be conducted in the mere future. The sample details collected from the participants is as follows:

AI, IoT and Automation Have a Key Role in Driving the New Normal

- The Covid-19 busted a couple of organizational myths like – long-term and large scale work-from-home is not viable or sustainable
- Organizations and IT leaders are prioritizing innovation to be in line with the current trend towards an economic slowdown
- Best drafted Business Continuity Plans (BCPs) didn't work out and they are being reworked with automation into play
- Before COVID-19, a majority of companies were human intensive, and now it is leading to a big challenge in scalability.
- Robotic Process Automation (RPA) and Artificial Intelligence (AI) back in board war rooms
- E.g Volvo and Mahindra, recently launched online sales, digital services, and contactless-service experience to their customers. They leveraged robotics, AI, and ML to continue their business plans to their operations, and minimize disruptions for their customers.
- Overcome crisis with effective amalgamation of human creativity and super-thinking with the fast execution capability of robots
- Post Covid-19, combined human and machine capabilities will enable Organization stay competitive in challenging business landscape amidst economic uncertainties.

Participants: Imthyaz Sheriff, Mohamed Sajid, arshia afreen, Dr.T.Bhuvanewari T..., SNEGA SENTHIL, Mohammed Farid UI..., Riju 13, Senkamalavalli Raja..., Mohamed Fazil
