Dr.K.Ganesh, Director – Office of Alumni Relations welcomed the participants and introduced the speaker to the audience who were connected via Google Meet. There were around 45 participants and the webinar was an eye opener to the budding aspirants who wanted to bloom in the field.

The webinar was a very detailed and fun dive into what being an entrepreneur means and what it entails. It was interesting to listen to the perspective about success and failures in being an entrepreneur.

One of the highlights of the session was his thought-provoking explanation of the 'purpose' Venn diagram, also known as 'IKIGAI'. It made the students view things from a new and exciting perspective and helped the participants ask very important questions to themselves. Another key moment was the explanation of the chart showing the progress from ideation of a venture to the end and all the different wins and losses an entrepreneur will have to face to get to the top. The speaker also highlighted the key points of what every Entrepreneur needs.

Mr.Imthyaz Sheriff briefed with many other graphs and metrics to explain the day to day of an entrepreneur, all of which allowed the participants to realize that a successful entrepreneur need not require lots of resources. A basic requirement of just a laptop and the proper mindset is all that is necessary to get started. He also shared his experience working with many different people on different ventures and talked about its negatives and positives and how to deal with them.

The session overall was highly informative, captivating, and enlightening. It stimulated the minds and inspired the participants to take a step towards being an entrepreneur.

The vote of thanks was delivered by Mr. John Mathew, Office of Alumni Relations. On behalf of the Department of CSE, Mrs. S.P.Valli, Assistant Professor Selection Grade/CSE, Department Alumni Coordinator thanked the speaker, all the students and faculty participants for joining the webinar.
