Note: This is an improvement of **Google Maps** as Google cannot recognize all locations and places in our campus

Step-1

First thing to do is to copy the locations of your interest and TH code and store it in your contact list similar to storing the phone number of a person.... Using COPY-PASTE..!!!

Tips

- **Here the Person name is Location**

- **TH code can be stored any column other than phone number field..**

- **You can find and store all your friends house codes along with his/her phone numbers in your contact list to visit them easily!!**
