Brief describe the provision in LMS to be used by HEI :-

B.S. Abdur Rahman Crescent Institute of Science and Technology has always encouraged its students and faculty members to utilize digital space for better teaching-learning. The institute has implemented a learning management system (LMS) namely Crescent LMS (<https://lms.crescent.education>) which operates in Moodle - Open Source software as front end and back end and is hosted on the Cloud platform in a secure manner (https) with Firewall for protection from unknown traffic. It has massive infrastructure capability to handle all requests and also provide secure service. It is made available 24 X 7 for the benefit of students and faculty for engaging teaching-learning process in a remote mode. All the courses are configured course-wise and class-wise in Crescent LMS. The teaching-learning process continued by uploading course materials, PPT, videos and audios for the benefit of the students. The assessment components were also facilitated through CRESCENT LMS. Internal components and formative assessments were assigned to students to ensure proper learning. Regular Attendance marking and Feedback from Students were also enabled. Students were provided with login and user ID to access the course contents and actively participate in the learning process, in a secured manner, which was also monitored by the respective course teachers. This platform facilitates both faculty and students to jointly collaborate and acquire knowledge in a simple and user-friendly manner. Salient features of Crescent LMS are: • Streamlined and improved process for learning • Bi-directional engagement between faculty and students • Tracking and reporting of skills • Quizzes and assignment for evaluation • Interaction via forums and knowledge sharing • Centralized and unlimited access to resources • Feedback on teaching-learning process • Anytime, anywhere learning

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- <https://lms.crescent.education>

Assessment mechanism	Continuous assessment components such as assignments, case study, quiz, with facility to conduct examination in a blended mode are facilitated in Crescent LMS.
Identified technological interface and interoperability	All office based tools such as Word, Excel, PDF, Power point, slide share, external URLs and web-based meeting tools are facilitated in Crescent LMS. To cater to the needs of learners with special needs, the facilities such as audio books, video lectures with subtitles and audio are provided. The Crescent LMS has Learning Tools Interoperability (LTI) standard prescribes a way to easily and securely connect learning applications and tools with platforms like learning management systems (LMS), portals and learning object repositories on your premise or in the cloud, in a secure and standard manner and without the need for expensive custom programming. Using LTI, an interactive assessment application or virtual lab, can be securely connected to the LMS with a few clicks.
Learner's Authentication Requirements	Unique user ID and password
Learner Registration - through a web application	Learner registration is facilitated through Data Centre of the institution
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	Active Engagement of the Learners is ensured through Announcement and Chat with reply / comment facility in Crescent LMS. Analytics of active engagement of learners and Reporting is monitored through Crescent LMS via Active Chats and Reports.
Payment Gateway –using Digital Payment system	A separate ERP tool is available for Digital payment.
Tracking the delivery of a Course or programme	Progress monitoring is available for tracking a course with the help of Reports in Crescent LMS.
Technical Know-how or Skills Requirements	Crescent LMS is a user friendly platform for teaching-learning process. A User manual (for faculty and students) is made available for ready reference.

Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-

The following ICT facilities are available: • Wi-fi enabled campus • Internet / intranet facilities with adequate bandwidth • Smart classroom – Laptop / Desktop, LCD projector • Centre for Innovation in Teaching and Learning (CITL) with facilities for recording and editing video lectures • Institution specific email ID (crescent.education) for effective communication • Digital library (e-learning resources) with global access / remote login • ERP for monitoring teaching-learning process

1	Yes	B.S.A. Crescent Institute of Science & Technology	GST Road, Vandalur-Chennai-600048-Tamil Nadu	Maintaining transparency and fairness in online exams Authentication is at the core of an e-assessment environment that includes allowing a student to secure access to his/her assessment procedure while maintaining the confidentiality and ensuring rightful identification. Multiple Authentication <input type="checkbox"/> Login Authentication via OTP for the registered students <input type="checkbox"/> Environmental Check (The application allows the student to start the test only if the camera, microphone, s/w version and network are compatible with the Proctored Online Examination Platform) <input type="checkbox"/> Face Verification& ID card verification by the proctor <input type="checkbox"/> Surroundings of the student is verified by the proctor to avoid any availability of suspicious objects or activity. The first layer of anti-cheating measures asks students to click their picture, furnish an identity proof and share registration details. The proctors, available round the clock, verify the photo IDs against registration details to attest if the students are bonafide. Furthermore, the authentication process allows only genuine students to appear for the exam, drastically reducing the probability of a fake identity. The integrity of the e-assessment is further safeguarded by lockdown application, which prevents electronic corruption and a student obtaining an unfair advantage. This feature locks the student in an e-assessment environment and blocks access to any other website during the exam and prevents access to multiple browser tabs. Live Proctoring Live proctoring has a human invigilator supervising the exam remotely via webcam. It comes with the functionality of pausing, resuming, or halting the test in real-time if deemed necessary. The proctor can communicate with the students through a chat window if they wish to clarify any undesired activity. Secure Browser The integrity of the e-assessment is further safeguarded by lockdown application, which prevents a student obtaining an unfair advantage. This feature locks the student in an e-assessment environment and blocks access to any other website during the exam and prevents access to multiple browser tabs. More Secure The confidentiality of the questionnaire is of the utmost significance in conducting online examination system demo and exams. Any misuse of content compromises the exams' standards and results in postponing or re-test. This problem is efficiently addressed in online examination system software. Questions can be randomized in a secure environment, and the exam content is stored in a database that can only be accessed by exam authorities.
